

EFT Network To Showcase FAXTellerPLUS™ Remote Deposit Capture At The Southern Financial Exchange 19th Annual Conference & Expo

Hawthorne, NY, April 15, 2009 – [EFT Network, Inc.](http://www.eftnetwork.com), a provider of innovative ACH and check processing solutions to financial institutions, corporations and businesses, will be exhibiting at the Southern Financial Exchange Conference April 20-22, 2009 in Tunica, MS. EFT Network will be located in the exhibit hall in **booth #15** and will be demonstrating its [FAXTellerPLUS™](#) Remote Deposit Capture solution. FAXTellerPLUS allows businesses, even consumers to participate in remote deposit capture by using a standard fax machine with no hardware equipment or software to purchase or download. Financial Institutions can offer FAXTellerPLUS to their business banking customers and as a home deposit solution for their consumers.

“FAXTellerPLUS is useful for businesses and consumers of every size, type and with single and multiple locations that receive low check volume (30 checks per day or less)” said Steve Davis, president of EFT Network. “Businesses that do not have access to the internet, want to eliminate the need for a PC or do not want to perform the functions associated with more traditional remote deposit capture systems will find FAXTellerPLUS economical and easy to use.”

At the SFE conference, EFT Network will showcase remote deposit capture using a standard fax machine and EFT Network's special check carriers. The carriers are transparent plastic sleeves with three pockets. The checks are placed inside the pockets and then faxed to EFT Network. The check carriers are customized to contain unique customer identifiers and depository bank information.

There's so much potential and opportunity surrounding FAXTellerPLUS. “Once we educate financial institutions on what the solution does, how simple it is to use, it instantly becomes clear that remote deposit capture is a solution that will add immediate value to their small business banking customers” says Steve Davis.

About EFT Network

EFT Network, Inc., a privately held company since 1998, provides exceptional check processing systems and ACH services across the United States. The Hawthorne, NY based company developed a Hybrid Web based Remote Deposit Capture system and a variety of ACH services that enable clients to collect, process and deposit electronic and paper based transactions faster and more efficiently. EFT Network's feature rich modular system ensures that money moves accurately, securely and quickly. Businesses of every size and type can transition from traditional paper-based payment and billing to electronic processing to enhance productivity and profitability.
